

Healthcare Spotlight

**Project Name:**

Oakville Trafalgar

Fabricator Name:

Steel City Millwork - Wall Cladding
Elite Stone - Millwork Surfaces
Allwood Carpentry - Millwork Surfaces

GC Name:

Ellis Don

Completed Date:

December 2015

Applications:

Corian® Solid Surface was used for wall protection, all operating rooms and procedure rooms. Corian® Solid Surface was chosen for seamless integration, infection control, durability and repairability. In addition to wall cladding Corian® Solid Surface was used for integrated sink and countertops in patient rooms and nurse stations etc.

Material Information:**Wall Cladding:**

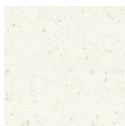

¼" Sheets – Approx. 8300 Sheets (*Combination of Glacier White and Linen*)
Linen & Glacier White - Split between two millworkers

Millwork Services:

Corian® Sinks – Approx. 260 Sinks (*Various Models*)
½" Sheets – Approx. 1600 Sheets (*Combination of Rice Paper & Whisper*)

Colours Used:

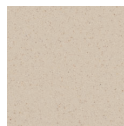

Glacier White

Linen

Rice Paper

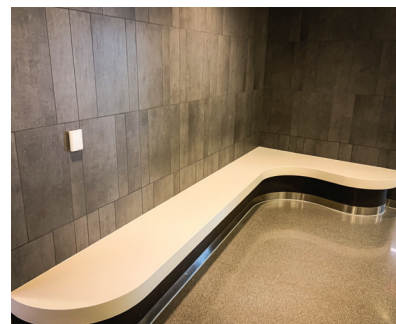

Whisper

Key Features for Material Section:

Corian® Solid Surface offers both flexibility and functionally durable design with a non-porous and seamless characteristic that is ideal in the healthcare environment. From the moment you enter the hospital lobby Corian® Solid Surface is the first point of contact for visitors and patients alike.

The Corian® Solid Surface kiosks are simplistic yet timeless in design. Operating and procedure rooms are clad from floor to ceiling in Corian® Solid Surface as wall protection creating a seamless application increasing infection control and durability.

Corian® Solid Surface makes the perfect material for this vital environment where any opportunity of bacterial growth or damage to the walls can result in downtime for the ORs or risk of hospital acquired infections.
