

The Tweed Terrace

The innovative craftsmanship continues inside the home. Corian® Solid Surface has allowed a seamless, curved and organic finish. Design by Raunik Design Group, photo by Rezolution Photography, all rights reserved.

The Tweed Terrace House in Australia challenges typical Gold Coast architecture. Comprised of two pods, the unique home was conceived by Mexican architect Javier Senosiain and made reality by Raunik Design Group. The process took over three years but resulted with a home that is now a local landmark.

An organic design sees the home in conversation with the surrounding landscape, using a language of curves rather than angles. The futuristic design is continued inside where custom joinery and finishes create a bespoke space. Soft and free flowing, the home sits in contrast to the sharp lines and angles of the surrounding high rises, instead taking cues from sea.

The innovative craftsmanship continues inside the home. Corian® Solid Surface has been used extensively in the living quarters pod. “We wanted a product that looks like it flows with the curved walls and emerge from wall. We wanted it to have its own form and dissipate in its own way.” – Scott Bowden, Project Leader, Raunik Design Group.

Corian® Solid Surface has allowed a seamless, curved and organic finish. The colour selections have been mindfully made to suit the rooms and their purpose. The bathrooms use Corian® Solid Surface Antarctica in a gloss finish for the curved vanity tops with integrated basins yet a smooth, matte finish for the bed surround and shelves, evoking a sense of calm in Glacier White.

The designs called for an expert fabricator with complex curves and thermoforming throughout. Prototypes were made to test the material performance as well as ergonomics and depths of basins. The resulting installation is of impeccable quality with the client exceptionally pleased with the finished home.

More information about Tweed Terrace:
