

## Luxe Lodge

Corian® Lava Rock used in shower wall and vanity benchtop and drawer fronts.

This project has the presence of a 7-star luxury hotel while at the same time mixes the warmth and organic feel of nature. It swept the Queensland HIA Bathroom and Kitchen Awards, but there is something you might not know about the beautiful Luxe Lodge – Corian® Solid Surface is featured extensively.

To achieve this look, the designer Mark Gacesa, mixed many natural look finishes like Corian® Solid Surface, honed slab marble, rock cladding, Hosowari cladding, dull brass and aged bronze with glamorous finishes like antiqued Tuscan amber mirror.

Along with its silky seamless finish, Corian® Lava Rock Shower walls blended perfectly into the material mix and allowed the desired design results to be achieved. Cool in its sophistication and calm in its appeal Corian® Shower Walls are warm and sensual to the touch and with no grout. It's very easy to clean, and to maintain high level of hygiene over years, making it perfect for this hotel environment. With superior sensory qualities and customizable designs, Corian® Shower Walls is meeting a wide variety of demands in terms of both style and function as required by interior designer, Mark Gacesa.

Glacier White was finished with Axolotl patinaed Bronze as custom thermoformed handles throughout the house that have a routed fret design that is a repeated theme. The handles on the vanity in the Main Bathroom do not have the routed fret design (they were left plain) because that pattern is not in this room.

As a side note – All of the tapware, etc colours were redesigned by Mark for this project and custom bi-coloured in Germany by Hans Grohe which is a first for Australia. In fact, all the metals in the project have been custom coloured – there is no silver to be seen.
