

LONG-TERM CARE

Meet and Exceed Healthcare Design Standards

Corian® Solid Surface meets the high expectations of the most demanding long-term care environments

Easy to clean, built to last

Corian® Solid Surface is easy to clean and can be easily restored if damage should occur. Corian® is on the cutting edge for healthcare infection control, the surface can be cleaned with soapy water or ammonia-based cleaners and can be disinfected with diluted bleach. Corian® is a nonporous surface that when properly cleaned, does not support the growth of mold, mildew or bacteria, which is critical when stopping the spread of HAI's.

Integrate sinks into the surface

One of the advantages of Corian® Solid Surface is the ability to create a continuous surface with integrated sinks. Seamless, under mounting techniques eliminate space that trap dirt, water and bacteria.

Design flexibility and reliability

Corian® Solid Surface wall cladding solutions offer architects and designers superior aesthetics combined with extraordinary design flexibility and reliability. Solid, homogenous and colored all the way through, Corian® Solid Surface is capable of creating eye-catching and contemporary surfaces with inconspicuous seams.

- **Design Aesthetics**
Style, flexibility, and color offer the latest design trends for the market.
- **Amenity Areas**
For today's active seniors, Amenity Areas are an important part of the environment.
- **Safe & Suitable Environments**
For the special design elements of an aging population as well as caregivers.
