

# Color Portfolio

## Color palette

Select from four product families made up of monochromatic, marble, metal, and cement aesthetics. The color palette matches up effortlessly with a wide selection of kitchen styles, from sleek modern interiors for the city to traditional settings suitable for country living.

Elaborated aesthetics of variegated marble or the patina of rusted metal open up a wealth of creative possibilities to ensure the Corian® Endura™ countertop is always a standout feature in the kitchen.

To complement the Corian® Endura™ offering, two finishes are available that look to improve the aesthetic properties of the cutting-edge surface solution. The satin finish furnishes the high-performance porcelain with a quiet sheen that delivers an understated feel with its low reflectance and color enhancing richness. With its finely textured surface, the mineral finish provides a tactile, earthy appearance, no matter the color, to make it look as if the material was extracted directly from the earth.

## Pushing the boundaries of innovation and style

Corian® Endura™ is a premium high-performance porcelain made from a recipe of natural minerals and cutting-edge technology. Compressed together under extreme pressure and then heated at high temperature similarly to how nature forges a diamond, this innovative material is a densely packed mass characterized by its durability and beauty.
