

LAPITEC
NATURALLY ITALIAN

LAPITEC® FOR BATHROOM SURFACES

NATURAL AND UNIQUE SURFACES.

Lapitec is a non-porous, non-absorbent material that is moisture resistant and inhospitable to bacteria and mould, making it the perfect choice for bathroom cladding. Its anti-bacterial properties, combined with the fact that it is easy to clean, ensure optimal performance in any situation requiring surfaces to stay clean for a long time.

Beautiful aesthetics together with functionality: not just pleasant to look at, but also safe thanks to the non-slip properties offered by Lapitec's structured finishes.
