

LAPITEC
NATURALLY ITALIAN

LAPITEC® FOR OUTDOOR KITCHENS

Lapitec® sintered stone is manufactured with 100% natural minerals without the use of man-made binders. This allows the material to be UV resistant and have a low co-efficient of thermal expansion and contraction. Sintered stone is highly resistant to scratches, abrasions, high temperatures and staining; these properties make Lapitec® the undisputed choice for exterior applications.

CHARACTERISTICS

- Through-body color and veining
- Available in 12, 20 or 30 mm thicknesses (59" x 132.5" slab size)
- Absorption rate: less than 0.02%
- Dimensionally stable
- Resistant to mold and bacteria
- Easy to clean and long lasting
- Workability of natural stone
- Low co-efficient of thermal expansion and contraction
- Highly resistant to heat and high temperatures
- Highly resistant to scratches and staining
- Completely non-porous, no sealers required
- Multiple finishes
