

EXPOSING MISCONCEPTIONS ABOUT **CORIAN® SOLID SURFACE**

WHAT IS **CORIAN® SOLID SURFACE?**

Corian® Solid Surface consists of natural minerals & pure acrylic polymer which combines durability & design flexibility.

Corian® Solid Surface brings a combination of beauty, quality & hygiene to residential spaces across the globe.

IT STAINS?

No, Corian® is resistant to stains. Any stains, even the most difficult, can be removed. With seamlessly streamlined features, there are no visible joints or cracks to collect dirt and moisture.

IT SCRATCHES?

Corian® Solid Surface is remarkably durable, which means it can withstand daily wear and tear, maintaining its stunning appearance for many years. Scratches, chips, and damage can be repaired, and a fabricator can renew and restore Corian® to its original beauty, making it look new again.

IT BURNS?

Corian® Solid Surface is heat resistant and remains undamaged in temperatures up to 212° F. However, as with all countertop materials, it is important to minimize direct heat exposure to protect your surface and investment.

IT'S HARD TO CLEAN?

Nope, it's simple; Corian® Solid Surface is seamless in design and non-porous, which means there are no grout lines and there's no place for bacteria and mold to take root. Stains are also a thing of the past as they are unable to penetrate the surface, making everyday clean up quick and easy.
