Set the stage with a **Grand Entry**

FIGURE3 • TORONTO, CANADA

THE PARKER BY FITZROVIA

At The Parker by Fitzrovia, M|R Walls delivered a striking architectural feature in the drive isle: a custom exterior-to-interior wall installation crafted from Corian® Solid Surface. Designed for both durability and elegance, the seamless installation elevates the arrival experience with a sculptural presence.

Inspired by the region's native forest, the bespoke design highlights local botany with refined artistry. Using their patented technology, the design conceals panel joints while withstanding Toronto's demanding climate.

This project shows how M|R Walls redefines grand entries—merging performance, placemaking, and design storytelling at the threshold.

HPI ARCHITECTURE • WALNUT, CA

MT. SAC COLLEGE STUDENT CENTER

MJR Walls' Readymade "Lake" design in Corian® Solid Surface delivers both aesthetic continuity and material performance across high-traffic corridors. The 3D-carved walls create movement and identity within circulation spaces while maintaining a minimal, modern language.

Designed for institutional durability, the nonporous surface resists impact, stains, and bacteria—ideal for educational environments. Installed by ISEC, the MJR Walls system integrates easily with standard connection details.

This application exemplifies how sculptural surfaces from MJR Walls balance visual richness with long-term maintenance and material resilience.

Make the wait worth it, Elevator Lobbies

STANTEC • PHILADELPHIA, PA

JEFFERSON HEALTH

At Jefferson Health's Honickman Center, M|R Walls transformed 17,000 square feet of elevator lobbies and hallways across 12 floors with the Readymade "Cloud" design. Crafted from Corian® Solid Surface. The panels frame elevator portals and curve around corridors to create a continuous, calming presence in a fast-paced healthcare setting.

The design supports neurodiverse sensitivity through tactile and visual softness without compromising cleanliness. Corian's grout-free, non-porous qualities provide optimal infection control and easy upkeep—critical for healthcare environments.

With seamless detailing, hygienic materials, and calming dimensionality, this project demonstrates M|R Walls' ability to deliver wellness-driven texture and architectural clarity in high-traffic environments.

Reception, redefined

GENSLER • LOS ANGELES, CA

WILLKIE LAW OFFICE

At the Willkie Farr & Gallagher LLP office, M|R Walls created a bold reception feature using Corian® Solid Surface in a backlit, custom-carved map of Los Angeles. The wall makes a refined statement on arrival—blending artistry, locality, and brand expression.

Produced with M|R Walls' patented technology, ensuring hidden seams and lasting durability, the wall offers a programmable backlight focal point with long-term durability. Ideal for corporate environments, this installation highlights how M|R Walls can bring bespoke artistry and brand distinction to even the most formal professional settings.

Branding, built into the surface

TESSERE • WICHITA, KS

WICHITA STATE UNIVERSITY

At Wichita State University, M|R Walls introduced a branded feature wall at the Innovation Campus. This installation showcases the Readymade "Flame" design in Corian® Solid Surface, backlit with integrated LED lighting and inlaid with a black Corian® logo. The result is a luminous, textured surface that embodies the institution's commitment to innovation, identity, and modern design.

Built from layered solid surface and lighting components, the wall delivers brand storytelling through form and light. This project illustrates how M|R Walls embeds identity directly into architectural finishes—making branding tactile, permanent, and architectural.

Showcase, designed to stand out

CABAZON, CA

MORONGO CASINO LOUNGE

At Morongo Casino's High Limit Lounge, MJR Walls designed a backlit, curved ceiling by lights up the room. The flowing, sculptural texture defines the space while complementing the lounge's luxury aesthetic.

This application was developed uniquely for this project through MJR Walls' Design Assist program offering full customization with aesthetic impact, durability, and ease of install at the forefront.

The result is a truly immersive showcase moment—one that turns surface design into architectural theater.

Facade, built to endure

TOLL BROTHERS • SAN DIEGO, CA

THE LINDLEY

M|R Walls developed a custom exterior facade for The Lindley, a downtown San Diego residential tower by Toll Brothers. Featuring a ribbon-inspired design carved from Corian® Solid Surface in Laguna Blue, the facade adds movement and visual identity to the building's urban presence.

Mounted on a ventilated rainscreen system, the panels are engineered to accommodate thermal movement, resist UV exposure, and meet facade performance standards. Combining visual impact with technical precision, this project exemplifies M|R Walls' ability to turn architectural surfaces into signature design elements.

This facade illustrates how M|R Walls brings high-performance texture to the exterior—merging design ambition with building envelope expertise.
