Make the wait worth it, **Elevator Lobbies**

NBBJ • SITKA, AK

MT. EDGECUMBE MEDICAL CENTER

Inspired by Southeast Alaska's mountains and coastal waters, MR Walls created custom sculptural Corian® wall systems that transform seven elevator lobbies into memorable architectural landmarks. Developed through an extensive design-assist process, approximately 3,500 square feet of seamless, non-repetitive surfaces were fabricated using MR Walls' patented puzzling technology.

Engineered for healthcare, the system integrates seamlessly around elevator openings, signage, and other architectural elements while meeting Alaska's seismic requirements. The result is a durable, hygienic architectural surface that combines biophilic design with precision engineering.

Bring unique beauty to **Hallways**

HPI ARCHITECTURE • WALNUT, CA

MT. SAC COLLEGE STUDENT CENTER

MR Walls' Readymade "Lake" design in Corian® Solid Surface delivers both aesthetic continuity and material performance across high-traffic corridors. The 3D-carved walls create movement and identity within circulation spaces while maintaining a minimal, modern language.

Designed for institutional durability, the nonporous surface resists impact, stains, and bacteria—ideal for educational environments. Installed by ISEC, the MR Walls system integrates easily with standard connection details.

This application exemplifies how sculptural surfaces from MR Walls balance visual richness with long-term maintenance and material resilience.

Set the stage with a **Grand Entry**

WASHINGTON, D.C.

CAPITAL ONE ARENA

MR Walls partnered with Gensler to create a bold entry for the luxury Vault Suites, featuring a backlit Corian® arch and a descending sculptural tunnel.

Through our Design Assist process, we delivered a unique texture, smooth curvature, precise detailing, and balanced illumination forming an elevated, signature arrival to the suites.

Reception, redefined

GENSLER • LOS ANGELES, CA

WILLKIE LAW OFFICE

At the Willkie Farr & Gallagher LLP office, MR Walls created a bold reception feature using Corian® Solid Surface in a backlit, custom-carved map of Los Angeles. The wall makes a refined statement on arrival—blending artistry, locality, and brand expression.

Produced with MR Walls' patented technology, ensuring hidden seams and lasting durability, the wall offers a programmable backlight focal point with long-term durability. Ideal for corporate environments, this installation highlights how MR Walls can bring bespoke artistry and brand distinction to even the most formal professional settings.

Branding, built into the surface

TESSERE • WICHITA, KS

WICHITA STATE UNIVERSITY

At Wichita State University, MR Walls introduced a branded feature wall at the Innovation Campus. This installation showcases the Readymade “Flame” design in Corian® Solid Surface, backlit with integrated LED lighting and inlaid with a black Corian® logo. The result is a luminous, textured surface that embodies the institution’s commitment to innovation, identity, and modern design.

Built from layered solid surface and lighting components, the wall delivers brand storytelling through form and light. This project illustrates how MR Walls embeds identity directly into architectural finishes—making branding tactile, permanent, and architectural.

Showcase, designed to stand out

CABAZON, CA

MORONGO CASINO LOUNGE

At Morongo Casino's High Limit Lounge, MR Walls designed a backlit, curved ceiling by lights up the room. The flowing, sculptural texture defines the space while complementing the lounge's luxury aesthetic.

This application was developed uniquely for this project through MR Walls' Design Assist program offering full customization with aesthetic impact, durability, and ease of install at the forefront.

The result is a truly immersive showcase moment—one that turns surface design into architectural theater.

Facade, built to endure

TOLL BROTHERS • SAN DIEGO, CA

THE LINDLEY

MR Walls developed a custom exterior facade for The Lindley, a downtown San Diego residential tower by Toll Brothers. Featuring a ribbon-inspired design carved from Corian® Solid Surface in Laguna Blue, the facade adds movement and visual identity to the building's urban presence.

Mounted on a ventilated rainscreen system, the panels are engineered to accommodate thermal movement, resist UV exposure, and meet facade performance standards. Combining visual impact with technical precision, this project exemplifies MR Walls' ability to turn architectural surfaces into signature design elements.

This facade illustrates how MR Walls brings high-performance texture to the exterior—merging design ambition with building envelope expertise.

PATENTED DESIGN + LIGHTING SYSTEMS

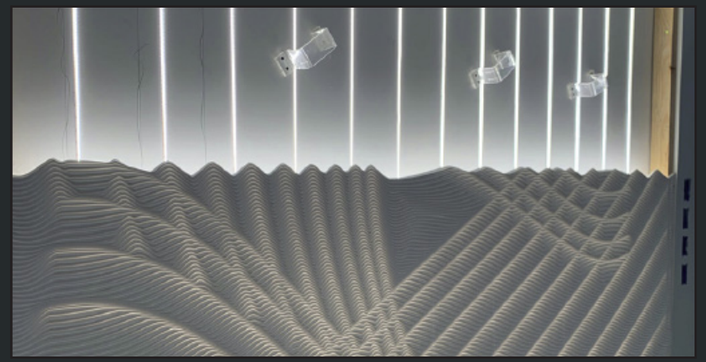

MR Walls Innovation

Seamless assembly. Integrated light. One continuous architectural surface.

PATENTED PUZZLING

MR Walls makes non-repeating designs possible at architectural scale by placing panel seams within the carved pattern itself. Precision-milled puzzle pieces conceal their edges inside the texture, allowing individual panels to read as one continuous feature.

INTEGRATED BACKLIGHTING

Integrated LED systems bring carved Corian® surfaces to life from behind. MR Walls coordinates LED strips, custom acrylic standoffs, and low-voltage power equipment as part of the wall assembly.

Service access is provided through a removable return cap; final access locations are coordinated to suit site conditions.

CORIAN® DESIGN

Corian® Exclusive Partners

Available in all Corian® colors.

CORIAN® HIGHLIGHTS

- **Seamless, Hygienic Surface** — Non-porous and antimicrobial.
- **Highly Durable & Impact-Resistant** — Designed for high-traffic spaces.
- **Thermoformable & Customizable** — Enables curved and organic designs.
- **Scratch & Stain Resistant** — Easy to maintain.

DESIGN FREEDOM

- Thermoformable
- Seamless
- Backlighting
- Repairable

PERFORMANCE

- Non-porous
- Class A Fire Rated
- UV Rated
- Impact resistant

TRUSTED MATERIAL

- Greenguard Gold
- HPD
- Widely specified worldwide
